SUMMARY

Cloud Engineer with proficiency in all major cloud platforms, passionate to design complex and scalable architecture. Worked on multiple domains including frontend, backend, devops and big data, thus bringing in knowledge to work and collaborate on any technology.

SKILLS AND PROFICIENCY

- Kubernetes | Terraform | Docker | Helm | Vault | ArgoCD | Ansible
 - AWS | GCP | Azure
 - SQL | MongoDB | Redis | gRPC | Prometheus | Grafana | Istio | Envoy
 - Golang | JavaScript (TypeScript) | Python | Rust | BASH
-

EXPERIENCE

Medly Pharmacy | Site Reliability Engineer

March 2021 - Present

- Built a custom framework which parses YAML definition file to create AWS resources
 - Setup alarms, metrics, tracing and dashboards using AWS CloudWatch for all application
 - Streamlined pipelines for infrastructure provisioning and application deployment
-

PROJECTS AND CONTRIBUTIONS

Kubernetes DNS Operator: Kubernetes DNS Operator is written in Golang which helps manage DNS records for various registrars | [Github](#)

Minimalist File Server: Minimalist file server written in Rust which can upload, server and display files from webpage or CLI | [Github](#)

Full-stack gRPC Server: A gRPC server written in React and Golang which uses Envoy Proxy to upgrade HTTP Headers | [Github](#)

Open Source Contributions: Contributed to [nextauthjs/next-auth](#) and [comtrya/comtrya](#)

CERTIFICATION

Certified Kubernetes Administrator

Linux Foundation (CNCF)

AWS Solutions Architect - Associate

Amazon Web Services

EDUCATION

Bachelor of Science (Research) | REVA University

August 2017 - July 2021

Specialization In Cloud Computing and Big Data
